

Ideation Phase

Brainstorm & Idea Prioritization Template

Date	14 July 2026
Team ID	
Project Name	SHOPEZ: E-commerce Application
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich number of creative solutions.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Selected Problem Statement

Develop a secure and user-friendly e-commerce platform that enables customers to browse products, manage carts, place orders, and allows administrators to efficiently manage products and inventory.

Step-2: Brainstorm, Idea Listing and Grouping

In this phase, the team conducted a brainstorming session to generate ideas for developing the ShopEZ – One Stop E-Commerce Platform. Each team member contributed suggestions based on customer needs, current market trends, and technical feasibility. The ideas were then organized into related groups such as User Authentication, Product Management, Shopping Cart, Order Management, Admin Features, Security, and User Experience. This process helped the team identify the core functionalities required for the application and provided a structured approach for selecting the most valuable features for implementation.

Step-3: Idea Prioritization

High Priority

- User Authentication
- Product Catalog
- Shopping Cart
- Checkout
- Order Management
- Admin Product Management

Medium Priority

- Product Search
- Category Filters
- Order Tracking
- Responsive UI

Low Priority (Future Scope)

- Wishlist
- Product Reviews & Ratings
- Payment Gateway (Razorpay/Stripe)
- Sales Analytics Dashboard
- Email Notifications
- Dark Mode
- Multi-language Support
