Customer Problem Statement Template:

The purpose of this problem statement is to understand the challenges faced by customers while shopping online and managing products. By identifying user needs, pain points, and expectations, the team can design an e-commerce platform that delivers a simple, secure, and efficient shopping experience.

For the **ShopeZ – One Stop E-Commerce Platform**, the customer problem statement helps define the requirements from both the customer and administrator perspectives. Understanding these challenges enables the development of features such as secure authentication, product browsing, shopping cart management, order tracking, and efficient product administration.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	An online shopper	Browse products, compare items, and purchase them easily from one platform.	Finding the right products and completing the purchase can be time-consuming and confusing.	Existing shopping platforms may have poor navigation, limited search options, and complicated checkout processes.	Frustrated and less confident while shopping online.
PS-2	A store administrator	Manage products, inventory, and customer orders efficiently.	Updating product details and tracking orders manually requires a lot of time and effort.	There is no centralized system to handle products, stock, and orders effectively.	Inefficient and unable to provide quick service to customers.
